[Darkguyaiman.com](https://darkguyaiman.com) (my portfolio)

Freelance Full Stack Engineer specializing in server-side development and responsive web interfaces. Builds web applications, management systems, and business automation tools using Next.js, React, TypeScript, Node.js, Express.js, and MySQL. Project experience includes tuition management, pharmacy ERP, scheduling, and operational analytics.

Education

Diploma of Information Technology

Malaysia University of Science and Technology | Selangor, Malaysia

December 2024 - July 2027 (expected)

IGCSE O Level

International Modern Arabic School | Putrajaya, Malaysia

January 2019 - January 2022 | 7 subjects: 4 A and 3 A grades*

Projects

• Tuitix Tuition Management System

Next.js, React, TypeScript, Node.js, MySQL

- Built a tuition management system with server-side and client-side rendering, interactive dashboards, and workflows for students, classes, and operations.
- Integrated a Node.js backend and MySQL database for authentication and structured data management.

• Al-Osmani Pharmacy ERP System

Node.js, Express.js, MySQL

- Developed a multi-branch pharmacy ERP system covering POS, inventory management, and order processing.
- Implemented role-based access control, sales reporting, and transactional data management.

• Logistics and Fulfilment Client Analytics Dashboard

Node.js, Express.js, EJS, MySQL, Google Sheets API

- Built a dashboard to monitor client activity, operational data, and performance metrics; integrated external data through the Google Sheets API for reporting.

• Rosterly Time Management System

Node.js, Express.js, EJS, MySQL

- Developed server-rendered scheduling workflows and shift planning features, with MySQL for scheduling data and time tracking.

• Company and Business Websites

Resonance, Pain.com.my, Backpack

- Built server-rendered websites with dynamic content and structured routing; used Node.js, Express.js, and EJS for Resonance and Backpack.
- Created responsive interfaces using HTML, CSS, JavaScript, Tailwind CSS, and jQuery across the projects.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, Python

Frontend: React, Next.js, Tailwind CSS, Bootstrap, jQuery

Backend and Databases: Node.js, Express.js, EJS, MySQL

Automation and Integrations: Google Apps Script, Google Sheets API, Python, n8n

Languages

English, Malay, Burmese

Work experience

Freelance Full Stack Engineer | Myself

March 2026 – Present | Selangor, Malaysia

- Develop custom web applications, SaaS platforms, admin dashboards, point-of-sale (POS) systems, and business automation tools.
- Build responsive interfaces and backend functionality using Next.js, Express.js, EJS, MySQL, and Tailwind CSS.

Co-Founder | Backpack Techworks

February 2025 - August 2026 | Selangor, Malaysia

- Developed custom automation systems using Google Apps Script and web applications using Node.js.
- Created the initial company website in Canva and developed the company website at backpack2u.com.
- Represented the company as its spokesperson.

Team Leader | Fussional

May 2024 - September 2025 | Remote

- Guided the team toward shared goals, coordinated work, and helped team members access the resources needed to complete tasks.
- Supported collaboration and resolved problems to keep team activities on track.
